About us

OURganic Gardens is based on a four acre small holding with vegetable and fruit gardens and a mature woodland .We run educational course on the environment and related themes as well as hosting a community garden and volunteers to the gardens. We are in the process of starting a CSA (Community Supported Agriculture) and also host Erasmus students and Workaway volunteers. We can offer a broad aspect of running our social enterprise.

Co Ordinator Joanne is also involved in Community Gardens Ireland and her local Donegal Community Gardens Network aswell as the Donegal Environmental Public Participation Network and various Permaculture projects throughout the country. OURganic Gardens is currently on the Irish SeedSavers Seed Guardian training for this year and they are looking forward to becoming a Seed Guardians for ISSA.

What we expect from trainee

We would be looking for trainees to be keen, enthusiastic, willing to learn new things and up for the challenge of working outdoors in a busy dynamic environment.

Trainees will also be given the opportunity to work with other community organisations and report on the holistic aspect of rural communities in Ireland . They will also work and live alongside the family so an understanding of this is important.

We would expect a mutual learning experience from trainees and all work will take place in Donegal , Ireland .
